

PETITION FOR VARIANCE
Comm 10 - Flammable, Combustible, and Hazardous Liquid Storage Tanks
Comm 48 - Petroleum Products

INFORMATION AND INSTRUCTIONS

In instances where exact compliance with a particular code requirement cannot be met or alternative designs are desired, the Division has a petition for variance program where it reviews and considers acceptance of alternatives which are not in strict conformance with the letter of the code, but which meet the intent of the code. **A variance is not a waiver from a code requirement.** The petitioner must **provide an equivalency which meets the intent** of the code section petitioned to obtain a variance. Documentation of the rationale for the equivalency is requested below. Failure to provide adequate information may delay your petition. Pictures, sketches, and plans may be submitted to support equivalency. If the proposed equivalency does not adequately safeguard the health, safety, and welfare of building occupants, frequenters, firefighters, or provide equivalent protection of the environment, the variance request will be denied. It should be noted that **a petition for variance does not take the place of any required plan review submittal.**

The Division is unable to process petitions for variance that are not properly completed. Before submitting the application, the following items should be checked for completeness in order to avoid delays:

- Petitioner's name (typed or printed).
- Petitioner's signature.
- The Petition for Variance Application must be signed by the owner of the building or project unless a Power of Attorney is submitted.
- Notary Public signature with affixed seal.
- Analysis to establish equivalency, including any pictures, illustrations or sketches of the existing and proposed conditions to clearly convey your proposal to the reviewer. If aboveground or underground tank is located outside of a building, a schematic reflecting setbacks, vehicle parking area and vehicle traffic patterns must be submitted.
- Fee of \$250.
- Any required position statements by fire chief or municipal official.

A position statement from the municipal fire code enforcement official is required for fire safety issues that involve setbacks from buildings or property lines. Position statements must be completed and signed by the appropriate municipal fire code enforcement official. See the back of ERS-9890-A, Petition for Variance Application form for position statement form. Signatures or seal on all documents must be originals. Photocopies are not acceptable.

Except for special cases, the Division will review and make a determination on a petition for variance within 30 business days of receipt of all calculations, documents, and fees required for the review.
